DEFEND AGAINST DAMAGE.

DEFENDER-GUARD

ARMOUR SPILL PROTECTION

LAYS OUT FLAT AND FAST

RE-USABLE

SLIP RESISTANT

Armour Defender-Guard is a high strength temporary floor protection solution that can absorb liquids without weakening it. The top-side consists of an embossed pattern which offers extreme grip under foot, along with the anti-slip coating on the under-side to avoid it moving on the finished surface. Due to the type of material, Defender-Guard lays flat every time without recoiling, which allows the user to lay it down quickly and effectively. Since it is high strength, it is re-usable and can be cleaned by vacuum or by wiping it down, and easily rolled up for re-use.
