SURFACE PROTECTION

SITE SANITARY SOLUTIONS

From day 1 we've always been committed to helping construction professionals all across Canada to save time, save money, and look good with our unique range of temporary surface protection products.

Recently we started getting feedback from our customers that sanitization products were becoming harder and harder to source, however they are absolutely essential to keep sites safe and operating where required. Since we're all about helping our customers in any way we can, we took on the challenge to see what we could do to help.

Through our robust supply chain, we now have an opportunity to help construction professionals with the following solutions to help keep sites safe and operating whilst combating Covid-19.

SURFACE DISINFECTANT SPRAY

Rebel Annihilator is a surface disinfectant that meets and exceeds CDC guidelines. The Center for Disease Control recommends a 60% concentration of isopropyl alcohol for use in killing germs and viruses. Annihilator Surface disinfectant is formulated with a 70% alcohol concentration.

Annihilator Surface disinfectant a citrus-scented solution suitable for use on many surfaces.

Rebel Annihilator is extremely easy to use. After cleaning the desired surface and removing surface contaminants, just spray and mist Annihilator on the surface you want to disinfect and let it air dry.

ANTISEPTIC HAND SANITIZER

Decon is a non-sterile, antiseptic hand sanitizer. Decon-I contains isopropyl alcohol and Decon-E contains ethyl alcohol.

An alcohol content of 70% of either ethyl or isopropyl are known and proven to be effective in decreasing bacteria. Fresh and citrusy, our Decon hand sanitizer is effective in decontaminating your skin.

This skin-softening formula also contains 100% pure, therapeutic-grade essential oils.
